Green Roof – Project Fact Sheet Elevation 314, Takoma, D.C.

Project Name: Elevation 314 – Mixed Use Development

Project Location: Takoma, Washington, DC, USA

Size / Type: Intensive Green Roof – September 2007

Project Description:

Provided design, specification, and construction administration for the 714 SF landscape over structure green roof. Aside from creating an attractive living and retail space, water management is brought to light by using open water troves that drain directly into the intensive green roof and a central courtyard bioretention area for onsite water quality and quantity control. This landscape over structure green roofs was the first such permitted stormwater management plan in the District of Columbia.

Recipient of the American Institute of Architects (AIA) 2005 Catalyst Award and a Special Commendation for Sustainable Design from the American Society of Landscape Architects (ASLA) Virginia Chapter.
