Green Roof – Project Fact Sheet US Botanic Garden

Project Name: US Botanic Garden
Project Location: Washington, District of Columbia, USA
Size / Type: 4,500 SF Green Roof

Project Description:

Creating a hands-on project for her students at the University of Pennsylvania, School of Design, faculty member Katrin Scholz-Barth instructed and guided students in their design approach and material selection for a living green roof retrofit on the US Botanic Garden South Addition.

Installation is planned after the structural load bearing capacity of the roof has been increased.
